ROE (Return on Environment) is the new ROI:
**Going green delivers real business benefits**

The HP Planet Partners Program helps close the loop and future-proof your company in the age of sustainability.

Recycling with HP

The **HP Planet Partners Program**[1] provides a free and convenient way to recycle HP IT hardware and supplies—ensuring that they will never be sent to a landfill. We aim to increase to 30% recycled content plastic in HP products by 2025—leading the industry.[2]

The right sustainability solution to address the challenges you face

We understand what you're looking for

Establish a sustainability framework for recycling

Investors, consumers, and governments are paying close attention to environmental, social and corporate governance (ESG) performance—Companies focusing on sustainable strategies and initiatives aligned with the goals of the Paris Agreement will be reaping the rewards.[3]

You want to...

Turn sustainability into your strategic advantage

Companies implementing sustainable initiatives which outperform their competitors' are able to use it as a key differentiator.[4]

Ensure that your HP IT hardware and supplies are properly handled during end-of-life

Our goal is to minimize the effort required by you to recycle your HP IT hardware and supplies and allow you to focus on what matters—innovation and driving your business forward.

We work with reputed partners with high recycling standards and transparency. View our top recycling partners here: https://h20195.www2.hp.com/v2/getpdf.aspx/c05403198.pdf.
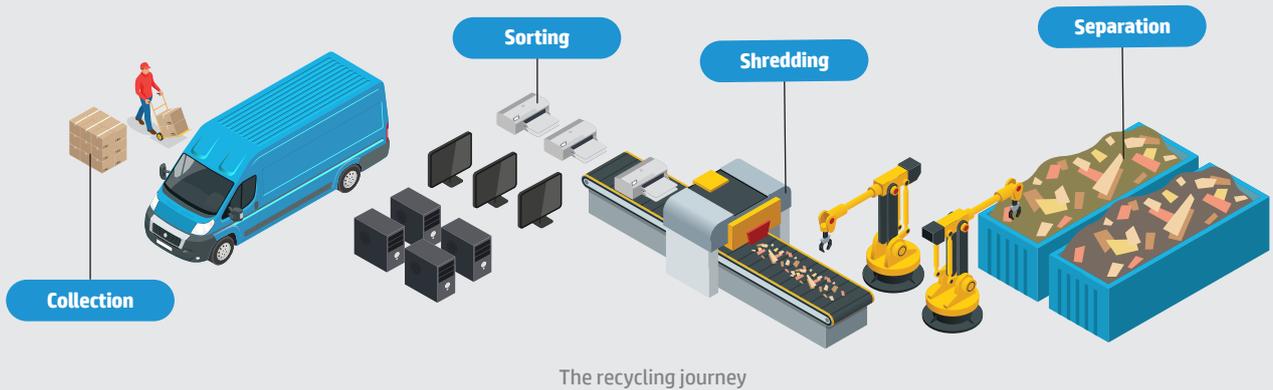

We partner with you to achieve your business and sustainability goals

We've got what you need

Recycle responsibly

Our Planet Partners Program is for end-of-life IT hardware and HP supplies (namely used Original HP ink and toner cartridges, LaserJet maintenance parts and supplies, and Samsung toner cartridges). With us, you can get a clear line of sight into your hardware and supplies end-of-life journey.
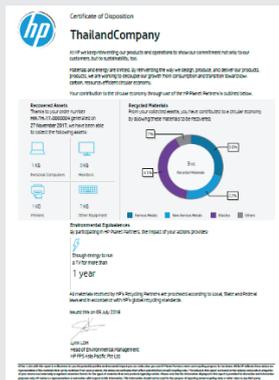

• **Global presence:** Collection of used products for return and recycling in 76 countries and territories worldwide.

Collection — **Sorting** — **Shredding** — **Separation**

The recycling journey

Achieve your sustainability mission

Our Planet Partners Program helps you reduce your environmental impact, keep products from the landfill, and measure your contribution to overall sustainability goals.

• **Transparent process:** HP complies with international standards to environmental goals.

Certificate of Recycling (CoR) for Supplies
and Certificate of Disposition (CoD) for Hardware

Improve operational efficiency

Our Planet Partners Program can help improve your recycling operations and offers free and easy return and recycling solutions for managing end-of-life assets.

1   Program availability varies. See www.hp.com/recycle.
2   Recycled content plastic (RCP) as a percentage of total plastic used in all HP personal systems, printer hardware, and print cartridges shipped during the reporting year. Total volume excludes brand-licensed products and after-market hardware accessories. Total RCP includes post-consumer waste recycled plastic, closed-loop plastic, and ocean-bound plastic used in HP product manufacturing. Personal systems plastic is defined by EPEAT® eco-label criteria. Subject to relevant restrictions on the use and distribution of materials destined for recycling and/or recycled feedstocks.
